

Clinical Management Seminar

Learn more about flexible endoscopes, endoscope video towers, and tooling/machining of medical components.

Earn 7.0 contact hours of Continuing Education Credits for nurses, 4.92 of which have been deemed GI Specific by ABCGN

The IMS Clinical Management Seminar is designed to address clinical, biomedical, and administrative needs in both the operating room and endoscopy center or GI lab. Held at our Birmingham lab, this one-day visit includes interactive rotations through the large and small diameter flexible departments; as well as our precision machining and manufacturing facility.

Where: IMS Lab
3200 2nd Avenue North
Birmingham, AL

Objectives:

- Analyze value of equipment management options
- Describe design considerations related to flexible endoscopes that impact safety, operation, maintenance, repair, and budgetary requirements
- Appreciate the role of engineering, manufacturing, and final assembly as it relates to the optimal performance of flexible endoscopes
- Tour flexible large and small diameter labs with hands-on activity stations
- Tour precision machining and manufacturing facility

Flexible CMS Dates
